Product Release Announcement
Latest Software Release Notes, January 2025

Enhancements and Issues Fixed

Automation & Lists:
- The condition for LMS - Course, Curriculum, and Sharable Content Object Reference Model (SCORM) of "Any" has been added to the User Smartlist, Drip Condition, Scoring, Automation, and Organization List Scoring.
- Conditions based on User Records, Additional Data, Contact Custom Data, Activities, and Engagement Status have been introduced in the Organization List.
- The "Not in" condition has been provided for Sales Playbooks in Contact Lists, Drips, and Scoring.
- Email and social drip conditions have been implemented based on whether they are starting or running in the User and Organization List.
- The "Sync with CRM" condition has been added to the Contact Smartlist, Drip, and Scoring.
- The "Created By" condition has been introduced in the Asset List.

Deals:
- Admins can now delete Deals by providing a reason, with a notification sent upon deletion.

Exports:
- All User fields, including Language, are now available for export.
- A checkbox has been added to the MDF Report, which, when selected, displays only assigned Organizations.

Galleries:
- Thumbnail, Card (Flyout View for Images), and List views have been provided for all galleries.

Notification Manager:
- Incentive activities have been added to the Notification Manager.

Playbooks:
- An icon option for external links has been introduced in Playbooks and LMS.
- For the Asset Object, an option has been provided to change the icon or add a thumbnail in Playbooks.
- If a "Valid To" date is specified and has passed, the completion status of Playbooks and LMS will be reset.

Reports:
- Blog post templates have been introduced in the Asset Report.

2FA:
- The "Remember this device for X days" functionality has been implemented for 2FA. The default period is set to 7 days, with the option to configure the duration. To change the default duration, contact support@mindmatrix.net.
