

Product Release Announcement

Latest Software Release Notes, April 2026

Enhancements and Issues Fixed

MFA enforcement configuration

- To improve security options for users, mandatory authentication enforcement with a configurable deadline (install- or company-level override) has been introduced. Site Admins (SA) are always prompted per session, while non-SA users can skip authentication until the configured deadline, after which enforcement is applied. SSO and external users remain exempt from this enforcement.

Playbooks & LMS

- When a playbook or LMS is reset, any existing certification associated with it is also reset.

Exports

- HTML text area fields have been included in the export of Users and Organizations fields.

Drip Campaigns

- When an email is copied from the Drip template/media, it is no longer displayed in Setup > Template and Compose Email or on the View Assets page.

Product Database

- Sorting functionality based on "Valid From" and "Valid To" values has been provided in the Product Database records.

View Assets

- A Banner section has been added at the top of the Asset Overview and View Assets pages.

Marketplace

- A Tax Rate page for Products and Solutions has been introduced.

Setup

- An icon indicating MFA-enabled users has been provided in Setup > Users.
- In the User/Contact grid, the actions "Send Email", "Add to Drip", and "View Assets" can now be performed on all records when no specific record is selected.
- Column customization for the Deal Grid has been introduced on Deal pages.

*Please note that some of the product updates described above are available in your account based on your current plan with Mindmatrix. Our team may need to enable an individual feature so you can gain access to it. If you would like to know more about adding a newly released feature to your account, email our team at support@mindmatrix.net. -- *Mindmatrix Services*
