- Opportunity status made to "Closed" will be in view mode and nothing can be changed or added

Document & Image Gallery:

- Description field provided for Images as well as Document in respective gallery

Roadmap Items for Early 2018

Hot-spotting in Image for Web Banner

Images in web banner can be hot-spotted to make them more interactive. User can provide URL redirect, text content and/or image for different types of hot-spotting like icons, menu and call-outs.

Google Calendar Integration

User can integrate their AMP account with Google Calendar and sync all the events. All the guests marked for events will be added as contacts and User will be provided filtered assets based on filters configured for Google Calendar by checking in event's name and description.

Opportunity record creation in Step process

Opportunities in a Company can be configured to follow "Step Process" of registering, associating contacts and closure of the Opportunity instead of default information entering form.

Opportunity Scoring with recommendation

Scoring based on Opportunity will be introduced and this will score the Opportunity based on rules set for them. e.g. "Market equal to HealthCare will have more score than Real Estate". User can also set recommendation based on previous Opportunity data, previous User closure performance and activities for the Opportunities.

Marketing Manager Dashboard with "Marketing Manager" widget

Marketing Manager persona Dashboard will be introduced with "Marketing Manager" widget in default design.

Twilio Integration for Phone calls

We will be integrating with 'Twilio' to call, record and playback phone calls made to contacts. In next phase we will have the call records incorporated in Smart list, Drip condition and scoring.

Thumbnail for Database records

User specially real estate ones can use an image field or manually upload thumbnail image for database record. This will provide "thumbnail" view for the records.

Please Note-- The above is a summary of anticipated product releases and may be subject to change.

Please be advised that some product releases listed above are available based on your current plan with Mindmatrix.

If you would like to know more about adding a new feature to your account that may not be included, contact your enablement specialist or account manager with Mindmatrix. You can also email our team at support@mindmatrix.net.
